- Augmented: Life in the Smart Lane
- Disruption, Innovation and the Future of Business
- Fintech, AI and the Digital Transformation of Financial Services

BIOGRAPHY

Introduction

Brett King is a world-renowned futurist, entrepreneur and thought leader on the future of business, technology and finance. Named the “Godfather of Fintech” by The Australian, he is a pioneer of digital banking and one of today’s most influential voices on technological disruption and innovation. As an international bestselling author, media personality and global speaker, Brett has transformed the way leaders and organisations think about the intersection of technology, business and human progress. His work focuses on how artificial intelligence, automation and digital transformation are redefining industries and reshaping the way we live, work and connect.

Professional Background & Credentials

Brett is the founder and CEO of Moven, the world’s first mobile, downloadable bank account, which became a leading platform for digital banking innovation and financial wellness. Moven pioneered in-app account creation, real-time financial feedback, and contactless payments, setting the standard for modern fintech solutions. As an adviser to global regulators, governments and Fortune 500 CEOs, Brett has helped shape fintech strategy and digital transformation agendas across the world. He has advised the Obama administration on the future of banking, and his insights have been sought by policymakers in China, Europe, and the Middle East. Brett is also the founder and host of Breaking Banks, the world’s #1 fintech radio show and podcast, reaching millions of listeners in over 180 countries. His most recent project, The Futurists, showcases the innovators and thinkers shaping tomorrow’s world. Over the past decade, Brett has delivered keynotes in more than 50 countries at major global events including TED, Wired, Singularity University, Web Summit, The Economist, CES, SIBOS, and World of Watson. His media appearances span CNN, BBC, CNBC, Bloomberg, ABC, and Fox, where he provides expert commentary on future trends.

Books and Publications

Brett King is the author of several internationally acclaimed books that have defined how industries understand technological disruption and innovation. His bestselling works include The Rise of Technosocialism, which

explores how technology and social change will redefine economies and societies; Bank 4.0, a deep dive into the future of banking in a world where banking happens everywhere but not necessarily at a bank; and Augmented: Life in the Smart Lane, which examines how artificial intelligence, robotics and smart technologies are transforming everyday life. Collectively, his books have been released in more than a dozen languages, achieving bestseller status in over 20 countries and influencing policymakers, business leaders and technologists around the world.

Awards and Recognition

Brett's groundbreaking work in fintech and digital innovation has earned him international acclaim. He has been named "King of the Disruptors" by Banking Exchange magazine, Innovator of the Year by American Banker, and #1 Global Financial Services Influencer by The Financial Brand. He is a Fintech Hall of Famer (CB Insights) and was shortlisted for the Advance Global Australian of the Year Award for his impact as one of the most influential Australians working abroad.

Speaking Style & Audience Value

Brett King's presentations are dynamic, fast-paced and thought-provoking, blending data, storytelling and visionary insight. He brings clarity to complex topics, exploring how exponential technologies, AI, blockchain, automation and digital ecosystems, are reshaping industries and customer expectations. He tailors every keynote to the client, combining entrepreneurial experience with deep knowledge of global innovation. Audiences leave with an inspired understanding of what the future holds and how to prepare for it today.

High-Profile Engagements and Global Reach

Brett's clients include leading financial institutions, global technology companies, regulators and international organisations. He has shared stages with world leaders and innovators at major global forums, consistently earning recognition as one of the most compelling and visionary voices on the future of business and technology. WHAT PEOPLE SAY

""Outstanding, it helped us to have meaningful conversations around our role as technology leaders. Our group walked away with a much deeper understanding of the future landscape of banking and how it will be impacted by technology.""

— Kira Dubas, Head of Strategy, Wealth Management Technology Morgan Stanley

""You truly did a masterful job of delivering a compelling message that was both informative and inspirational. Your insights were provocative and eye-opening, and initial audience reactions speak to the power of your story telling. You definitely set the bar for future speakers!""

— Jeanetta Vena, Manager, Leadership Development | Leadership Development & Talent Management TD Bank

""On behalf of FinTechTaipei, thank you so much for your invaluable contribution to the success of our event, FinTech Taipei, last week. Your speech at the conference was fantastic, and we have received great positive feedback from the audiences.""

— Shan, Managing Director FinTechSpace and FinTech Taipei
